

SUMMARY

Award-winning, development-conscious Senior Product Designer with a deep understanding of the software development lifecycle and expertise creating scalable design systems across complex SaaS product ecosystems. Leads design strategy and execution for 20+ interconnected software products, and has built AI-assisted design-to-code workflows that cut handoff time by more than 75%. Experienced in component-driven frameworks (Angular, with working familiarity in React principles and Material UI architecture). Manages and mentors designers, and bridges design and engineering to deliver accessible, intuitive, high-performing solutions that drive business growth and elevate user experiences.

SKILLS

Multi-Product Scaling & Ecosystem Design

Front-End Prototyping & Development

Wireframing & Prototyping

AI-Assisted Prototyping (Claude Design, Claude Code)

Custom Claude Agents & MCP Servers

Accessibility (WCAG) & Inclusive Design

Agile & Scrum Workflows

Design System Architecture & Governance

Responsive & Adaptive Design

Documentation & Design Specs

HTML, CSS, JavaScript, TypeScript, Angular

Design Team Leadership & Mentoring

Figma / Sketch / Adobe Creative Suite

WORK HISTORY

Senior Product Designer PrismHR

November 2022 – Current

- Built and scaled the Prismatic Design System, an 80+ component Figma library and the design standard for 20+ products under PrismHR's Unified User Experience initiative, including HCM, ATS, Payroll, Talent Management, Performance, Onboarding, Report Center, and Employee Management.
- Led design and front-end development for a major HCM product overhaul, delivering 400+ views in HTML, CSS, JavaScript, and TypeScript; contributed to a 2024 Stevie Award for Best New Product.
- Introduced an AI-assisted design-to-code workflow (Claude Design, Claude Code) that turns Figma designs into functional Angular prototypes, cutting design-to-front-end-to-engineering handoff time by more than 75%.
- Co-developed custom Claude agents and MCP servers with strict design system guardrails, enabling project managers to generate compliant mockups that communicate ideas clearly to design and engineering.
- Designed and built front-end workflows for an AI recruiting integration in the ATS that screens and scores candidates against requisition criteria, filtering out unqualified applicants and speeding time to hire.
- Designed an end-to-end onboarding platform through engineering handoff and implementation; created a future-state redesign with a streamlined workflow, new stepper, and restructured sections and steps.
- Designing and prototyping an employee/manager portal with customizable dashboards and widgets to increase engagement and self-service.
- Mentor global design and dev teams on system-wide standards, guiding the integration of acquired products into the Prismatic Design System to unify workflows and interfaces across the product ecosystem.
- Design and document Angular components in Storybook and a proprietary documentation site; validate UI in Chromatic for design fidelity.
- Implement design tokens to support white-label theming, dark mode, and color-blind-accessible themes, strictly adhering to WCAG 2.1 AA as a minimum.
- Managed and mentored multiple designers through coaching and career growth planning.

Front End Designer Sterling Marketing Group

June 2018 – November 2022

- Led a website redesign and marketing campaigns that grew recurring revenue by 20%+ within four months.
- Enhanced project platforms with JavaScript, HTML, CSS, Bootstrap, and Figma to deliver responsive, user-focused interfaces.
- Partnered with product managers and stakeholders to translate business goals into site maps, user flows, wireframes, and mockups.
- Designed customer communications and email marketing assets and resolved interface performance issues to improve user experience.

EDUCATION

Associates of Art – Graphic Design
Briarcliffe College
